

ABLE TO ENJOY **project** **CUSTOM REGENERATION**

CUSTOM REGENERATION is a new project by the company **Able to Enjoy**. Its objective is to retrieve unused or abandoned wheelchairs in order to reduce waste expenses and help people with economical problems. Its aim is to create an **online market for reconditioned mobility**: manual wheelchairs, sports chairs, power chairs and many other products or medical equipment that being completely reconditioned, offer the advantage of lower prices.

Reconditioned products are used means of transportation, repaired by qualified technicians and sold at lower prices compared to the original ones.

CUSTOM REGENERATION believes in a **new economic model**, the goal of which is to become an alternative to large scale wheelchairs and aid distributions.

Three are the offered alternatives :

- 1) An **online shop** where **Able to Enjoy** sells reconditioned products directly to consumers.
- 2) A **proper shop** where people can try and buy reconditioned products.
- 3) An **online and/or proper shop** where people can rent reconditioned products for long or short periods of time.

Medical aid waste

Every manual wheelchair, sports and power chair that are no longer needed or functioning, are often abandoned in people's homes, hospitals or in companies warehouses.

With Regeneration project sports becomes accessible to everyone

Able To Enjoy is a project that wants to **bring back to life** these medical aids, inserting them in a new circle of life, rather than having them abandoned or disposed, which are all **expensive operations**. Each Reconditioned Certified Product is tested and certified by qualified suppliers as "like new" and guarantees a 1 year warranty.

Thanks to the net of contacts with companies of all technical and commercial competences, **Able To Enjoy** has the resources to manage this type of activity.

The **CUSTOM REGENERATION** project main activity will be to functionally restore these medical aids in order to resell them at better prices or renting them for long or short periods of time.

Its other aim is helping all those who desire to practice sports, but due to excessive equipment prices, are unable to do so. This project will therefore facilitate the approach to sports, improving the well-being and life style of all!

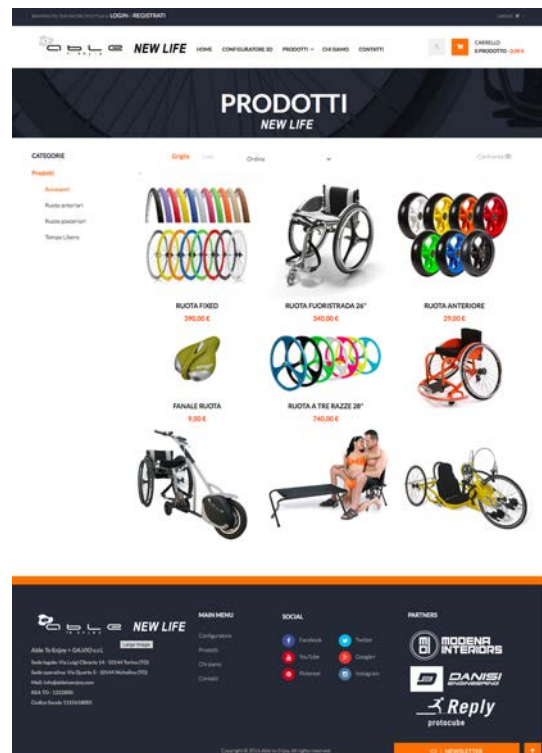

ABLE TO ENJOY AND MADE IN ITALY STYLE

This reconditioning operation offers a new life to these products, transforming them according to the styles and tendencies of the moment. It also provides accessories such as: wheels, rims, fabrics, carbon parts and varied texture colors.

RECONDITIONED

ABLE TO ENJOY - AFRICA

Inclusive mobility is not a luxury of rich societies. It is what a person requires no matter where in the world. It's a style of life that acknowledges people's rights and needs and helps to improve the community evolution.

CUSTOM REGENERATION is a project to aid disabled people in countries with difficult individual and social conditions. Its aim is to create more favorable economical conditions to support disabled people's motility and to **allocate part of the project's wheelchairs to Africa or those countries hit by natural disasters.**
